

Link Files

link

Now, it's easy to do real work while mobile.

Link is a single, secure app with all of your work applications and files.

Link Files is a powerful enterprise-grade file sharing solution that offers the advanced, intuitive features you need to be truly productive and secure using personal smartphones and tablets.

With Link Files you can...

- Securely access Word, Excel, PowerPoint, and PDF documents from WorkSite, NetDocuments, SharePoint, CIFS and other network file shares using one easy-to-use, secure app.
- Save documents for offline use.
- Use the powerful, flexible search for files across multiple network file shares by File Name, Author, Selected Text, and Document ID.
- Edit documents with Microsoft Office Online for a native experience.
- Edit documents while offline with the secure Link Word editor.
- See all documents shared with external parties, set expiration timers, access rights or passwords, and revoke access at any time.

Key Features of Link Files

- View Word, Excel, PowerPoint, and PDF documents from WorkSite, NetDocuments, and SharePoint network file shares and more from one easy to use secure app.
- Save documents for offline use.
- Review and edit documents with Microsoft Office Online for a native experience.
- Edit documents while offline with the secure Link Word editor.
- Securely share documents internally and externally and across multiple personal devices.
- Send, control, and audit secure links to files for external access.
- Tap and hold to open files for Editing, Save Offline, Rename File, Delete File, Show File Properties.
- Sort files by File Name, File Type, Last Modified, File Owner, and File Size.
- File updates or changes sync in real time back to the place of origin.
- Choose Link's compact or expanded view to display more or fewer files in your screen; display files in thumbnail with icons or in list views.

- **Secure access to all network file shares**
- **Intuitive mobile-optimized app offering the advanced features necessary to be productive anywhere**
- **Highly secure, integrated with the Link data security and secure delivery platform**

“With Link Files we created our own “Dropbox”. The files are in our control, in our Windows file shares, behind our firewall, and employees can securely access them from iOS and Android devices. That was exactly what we needed.”

- Director, IT Infrastructure

Mobile Helix Link

Mobile Helix Link is a powerful secure platform for your enterprise apps and data that eliminates the fixed and mobile divide. Link is the most secure way to provide your workforce with files and applications on personal mobile devices.

Link enhances enterprise productivity by combining unparalleled security for your enterprise data, a unique open HTML5 application development and delivery platform, and breakthrough patent pending performance enhancement technology.

Link may be deployed fully on-premises or in the secure Cloud.

The Link licensing model is simple. Products are licensed per user per 12-month period. Unlimited devices per user, access to unlimited enterprise applications, no other licensing fees.

Additional information on the Mobile Helix Link Architecture may be found at www.mobilehelix.com.
