Mobile Helix Joins iManage Technology Partnership Program

Integrated solution empowers lawyers and other professionals with easy, secure mobile access to documents

New York, NY – January 12, 2016 – Mobile Helix, an innovator in encrypted mobile solutions for lawyers, today announced that they have become an iManage Technology Partner. Mobile Helix has integrated its LINK mobile app with iManage Work, providing busy lawyers with access to key documents from smartphones and tablets.

iManage Work is the most widely used Work Product Management solution in law firms and corporate legal departments. Using this new integration, lawyers can view, search, check-in, check-out and edit documents in iManage Work with Mobile Helix LINK, enhancing lawyers' productivity and responsiveness when out of the office.

LINK's unique, seamless integration of iManage Work and Email facilitates key legal workflows, including:

- Viewing an NRL attachment to an Email
- Composing an Email and attaching a document in Work
- Sending an Email and Filing to Work
- Securely editing a document and checking it into Work

"Our focus with LINK is to give lawyers a single, easy-to-use mobile app with the key resources which they need to be responsive to clients," said Seth Hallem, CEO and co-founder of Mobile Helix. "The integration of iManage Work with LINK gives lawyers quick access to essential docs even when they are out of the office."

LINK is a secure container app, ensuring that all data and documents remain encrypted and protected by the LINK app at all times. LINK employs single sign-on, which enables lawyers to login once to use Work, Email, Calendar, SharePoint and other intranet applications. With LINK, lawyers are productive anytime and anywhere, and their firms can be confident that all sensitive data is safe.

About Mobile Helix

Mobile Helix, Inc. (www.mobilehelix.com) provides software solutions which enable lawyers to be productive from smartphones and tablets. The LINK™ system integrates iManage Work, NetDocuments, Outlook, network file shares, SharePoint, and the firm intranet in a single encrypted app. Mobile Helix solutions deliver the high level of security required by clients in regulated industries yet are lightweight and affordable to deploy.
